 (FOR KEY SEE REVERSE)

25X1

1. In late August 1954, Ing. Guenter Sicha, of VEB Funkwerk Koepenick, went to Albania in order to install a KN-2 installation in the East German embassy in Tirana. The main parts of the KN-2 installation are a short-wave transmitter and receiver.
2. Since Sicha has been assigned the task of developing a medium-wave and short-wave Adcock location finder, the start of this development has been deferred until his return from Albania.

25X1

Comment. The KN-2 set has been installed in the East German embassies in Peiping, Moscow, Warsaw, Sophia, Budapest, Bucharest, Prague, and the Foreign Ministry in Berlin.
